# Webinar – 2K Mixing & Color Change Product Portfolio

September 30<sup>th</sup>, 2021

# ***Carlisle Fluid Technologies: Experts Metering and Mixing Technology***

What we'll cover today:

- What are plural-component coatings?
- Benefits of using electronic 2K equipment
- Next-generation IntelliFlow 2K product line
- Color change and meter mix accessories
- How to select 2K equipment and accessories

# What are plural component coatings, and why are they used?

## ▪ What are plural component coatings?

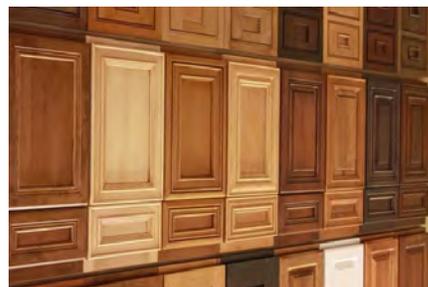

- Coatings that involve mixing 2 or more components immediately prior to application
- Have many different chemical compositions, such as urethanes, epoxies, and acid-catalyzed

## ▪ Why are these coatings becoming more popular?

1. Lower VOC's
2. Increased durability, chemical and UV resistance
3. Reduced curing needs

## ▪ Almost every major industry now extensively uses plural component coatings

- Automotive
- Industrial
- Agriculture and Construction
- Marine
- Infrastructure
- Wood
- Electronics

Innovation *Applied*

**CARLISLE**  
FLUID TECHNOLOGIES

# Plural Component Metering and Mixing (2K and 3K)

## What is electronic 2K equipment?

- Provides on-demand mixing and metering of plural-component coatings
- On-board controls automatically flush and change colors, regulate fluid pressure, and measure material usage and performance

## Why should you use it?

- Mix on-ratio just as you need it: Eliminate wasted coating and off-ratio mixing
- Can save over \$50,000 per year vs. hot-potting by eliminating coating and solvent waste, and costly rework
- Precisely control flowrate to the applicator for automatic applications

## When should you use it?

- Carlisle Fluid Technologies range of 2K equipment is extremely flexible and can be used in almost any application
- Automotive, Industrial, ACE, Aerospace, Marine, Electronics, Wood
- Solventborne, Waterborne, Electrostatic
- Manual or Automatic Spray, Low or High Pressure

## Why use 2K proportioning equipment over hot-potting?

- The average high-production facility wastes \$50,000 - \$65,000 per booth every year hot potting: Electronic 2K units pay for themselves in less than 1 year
- What are the visible and hidden costs of hot potting:
  - Wasted material
  - Wasted solvent
  - Wasted time spent mixing
  - Product rework and quality issues due to off-ratio mixing
  - No guarantee your coating application is to spec
  - Increased VOC emissions and reporting
- Carlisle's Account Managers specialize in developing application-specific ROI calculations: We can prove the savings to the end-user

## Electronic 2K units form the cornerstone of automated processes

- For larger, automated processes, proportioners are critical to maximize process speed and repeatability
- Carlisle's 2K units seamlessly integrate with robots, PLC's, and SCADA systems for centralized process control
- Proportioners can be used to manage:
  - Flowrates
  - Mix ratios
  - Color changes
  - Flushing
  - Jobs and recipes
  - Material usage tracking
  - Process optimization

# Carlisle Fluid Technologies Next-gen 2K Family: IntelliFlow

The new IntelliFlow product family represents best-in-class 2K performance and connectivity

## Next-gen performance:

- Large, intuitive, full-color touchscreens
- Seamless communication and integration
- Dynamic mixing reduces coating and solvent waste
- Modular, scalable architecture

Launching complete line through 2021-2022

# Ransburg 2k Equipment Offerings

## Entry-level

### IntelliFlow RM2:

- Entry-level manual spray
- 2 hand guns
- 7 colors, 1 catalyst
- Moving up from hot-potting
- Touch up or full production
- Distributed product

## Flexibility

### IntelliFlow RF2:

- Flexible Manual or Automatic Spray
- Hand guns, reciprocators, or robots
- 30 colors, 6 catalysts
- 2K or 3K
- Up to 4 fluid panels
- Seamless communication and integration
- Distributed or custom configured product

## Premium

### Ransburg RCS2

- Premium Automatic or Manual spray
- Robots or premium manual applicators
- 10 colors, 1 catalyst
- Rapid triggering and responsiveness
- Custom configured product

# Intuitive Controls

## Large, full color touchscreens

- 10" or 15" screen depending on model
- Scratch-resistant and resists all major solvents

## Easy to learn and use

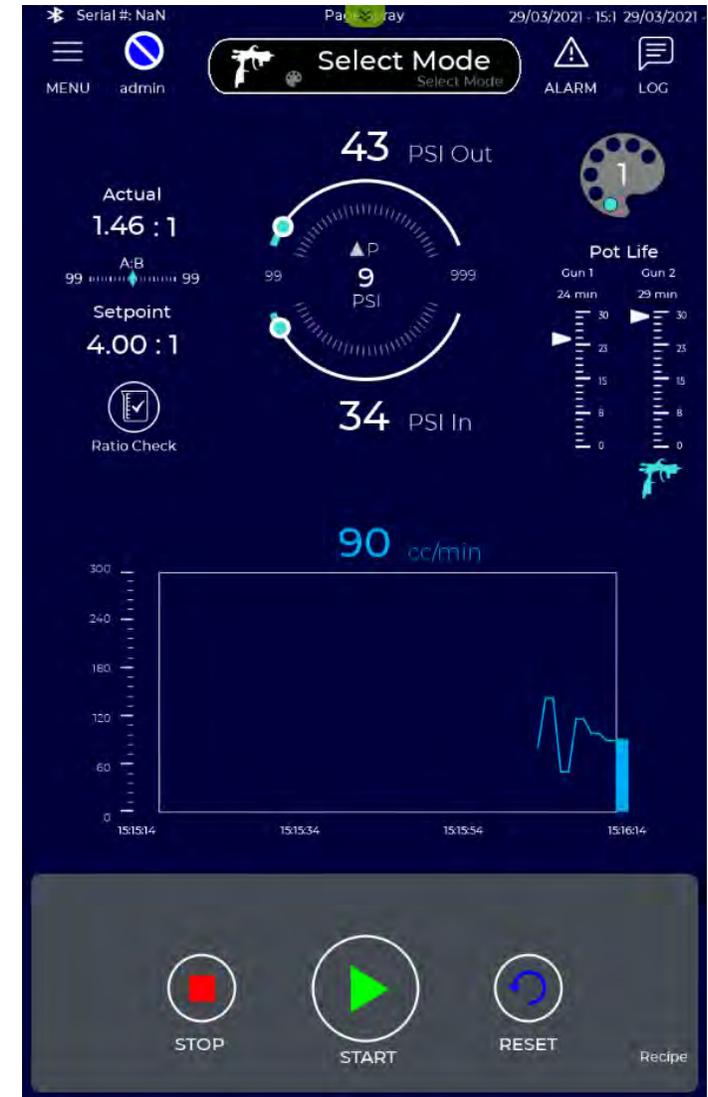

- App-like interfaces will feel natural to both new and experienced operators
- Both visual and numeric readouts to quickly visualize equipment status
- Simplified primary operation screens in front of full-functionality configuration and diagnostic screens

## Automate common processes and avoid costly mistakes

- Common operations like color changes, flushes, and flow adjustments can be done in 3 presses or less using customizable recipes
- Multi-level password protection to avoid accidental or unwanted process adjustments

## Visible alarms tell you what's wrong and how to fix it

- Visual and audible alarms with on-screen notifications
- Alarm pop-ups tell you what's wrong, and give step-by-step instructions to correct

# Seamless Connectivity

## All IntelliFlow units come standard with Ethernet I/P connectivity

- o Profinet, EtherCat, Device Net, CC Link and more also available

## Export process data in real-time or batches

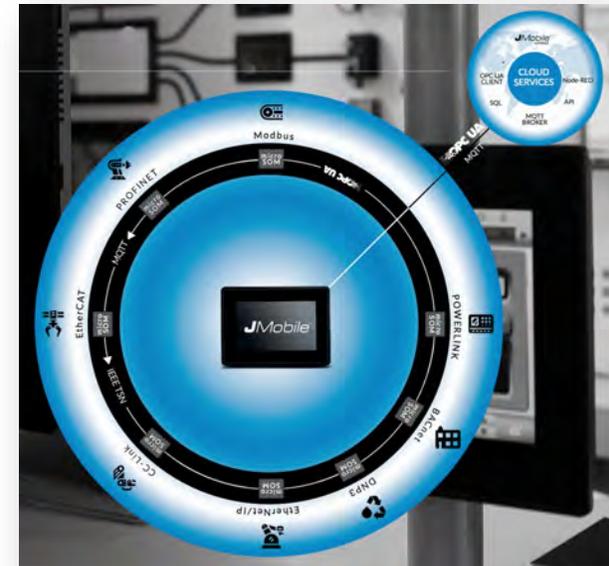

- o Track material and solvent usage, VOC's, ratio and flowrate actuals

## Send/receive data and control from central PLC or SCADA system

- o Open PLC architecture can be quickly configured for retrofits or new installs
- o Send color change, ratio, and flowrate commands to the unit
- o Easily monitor equipment as a part of your whole process

## Remote monitoring capability for real-time diagnostics

- o If enabled, CFT or your authorized distributor can remotely login to your equipment for troubleshooting and support
- o Don't wait for a service tech to arrive, get it fixed right away

# Best-In-Class Fluid Performance

## Dynamic mixing reduces waste and maintenance time

- Continuous ratio and flow control eliminates need for Integrator
- Saves coating and solvent waste on every flush
- Simple mix blocks flush well and are easy to maintain

## Fluid solutions to meet any process requirement

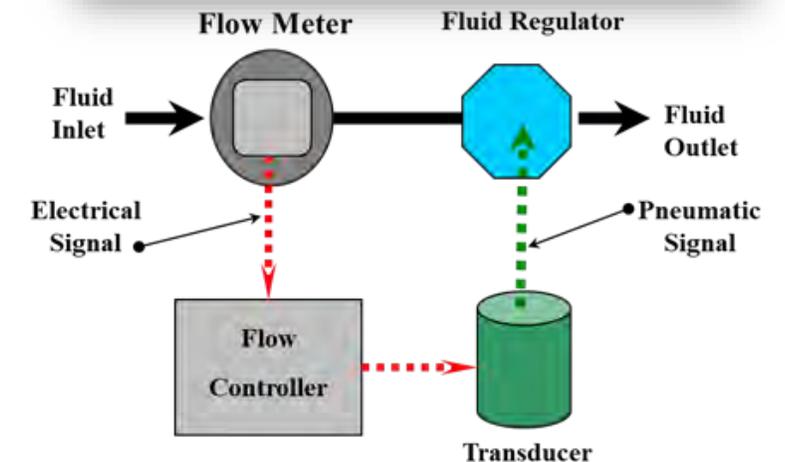

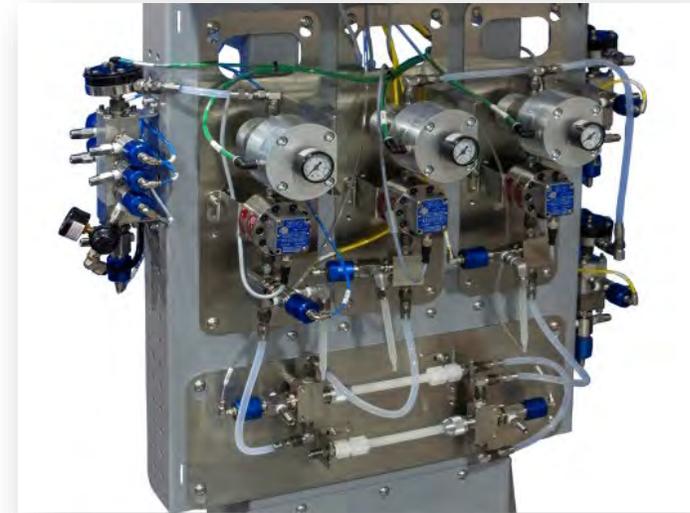

- Solvent or waterborne, electrostatic or non-electrostatic
- Wide range of flow control devices available to match your process and budget
- 1K, 2K, or 3K flow and/or ratio control

## New standard flowmeters increase ratio and flow control accuracy

- Higher resolution for faster response rates and increased control
- Abrasion resistant internals, with option for acid-catalysts
- Coriolis meters also available for highly abrasive or sensitive materials

## High-speed processors increase responsiveness and reduce lag

- Improved fluid components combined with faster controllers provides precise process control, even rapid triggering, low flowrates, and high ratio operation.

# ***Modular, Scalable, Easy to Order***

## **Start small, expand later**

- Accessories and add-on kits available to expand the capabilities of your system after first installation
- Go from 1K to 2K, or 2K to 3K
- Convert from manual to automatic spray
- Swap to different fluid components as your process evolves

## **One control architecture for the whole product range**

- Easily install and use multiple different IntelliFlow products throughout your process

## **Order turn-key configurations or custom-engineered solutions**

- Single part number configurations, with shorter lead times and very competitive pricing, designed to meet the most common process needs
- Or work with us to select a custom configuration

## ***IntelliFlow RM2: Entry-level electronic 2K with extremely simple operation and wide process capabilities***

- **Intuitive controls for easy operation by new or experienced users**
  - **10” full-color touchscreen** controls all process functionality
  - “3 presses or less for all common day-to-day operations”
  - Built-in troubleshooting for faults and errors to stay up and running
  
- **Reliable fluid panel can handle almost all common 2K hand gun applications**
  - **Up to 7 colors and 1 catalyst**
  - **1:1 to 100:1 material ratios**
  - Hardener flow rates as low as 2 cc/min
  - Low pressure capability at launch, with 3,000 psi coming in 2022
  - Coriolis flow meters also available for challenging materials
  
- **Increase efficiency and reduce coating and solvent waste**
  - **On-demand metering and mixing** with 1% flow and ratio accuracy drives significant reductions in coating waste. No integrator means less waste.
  - **Automatic color change and flushing** with programming for each color
  - **Standard air-solvent chop** uses 65% less solvent
  - **Track and export process data** such as paint and solvent usage, spray time, ratio and flowrates, alarms and faults

# RM2 Configurations and Accessories

## How to select your configuration:

1. Choose 1 or 7 colors
2. Select pump size:
  - a) If max catalyst flow is less than 100cc/min, select 300 pump
  - b) If max catalyst flow is greater than 100cc/min, select 600 pump

### Low Pressure (250 psi)

Number of Colors	Number of Catalysts	Catalyst Pump Size	Part Number
1	1	300	RM2-11121
1	1	600	RM2-11111
7	1	300	RM2-11127
7	1	600	RM2-11117

Recommended Accessories
Floor Stand
Gun Flush Box Kit
2 Gun Manifold
Remote Color Change Kit
Solvent Flowmeter Kit
Catalyst Flow Sensor Kit

- All configurations include:**
- Air cutoffs for 2 guns
  - Solvent air/chop flushing
  - Gear flowmeter
  - Stack light with buzzer
  - Wall mounting

## ***New Accessory: 2-gun Manifold***

- 2-gun manifold allows independent, air-piloted control of coating distribution to each gun
- Only load, spray, or flush 1 gun when necessary, then quickly switch to 2 gun operations
- No managing ball valves to distribute flow
- Spray with 1 port, batch mix into cup from other port

# IntelliFlow RF2

## ***IntelliFlow RF2 Automatic: Maximize process savings with an incredibly intuitive, reliable, and flexible plural-component system***

- **Intuitive, seamless operation by an operator, central PLC, or SCADA**
  - **15" full-color touchscreen** controls all process functionality
  - **Open communication:** Ethernet, Profinet, Device Net, CC Link, Wi-Fi, and more
  - Fluid panel can be located in-booth, and remote operator panel allows in-booth control
  
- **Reliable, flexible fluid panel meets all major process needs**
  - **Closed-loop ratio and flow control** for almost any solvent or waterborne, electrostatic or non-electrostatic coating
  - **Up to 30 colors and 6 hardeners** with programmable changes, flushes, and recipes
  - **Low and high pressure configurations**, with wide viscosity and flow rate ranges
  - Gear, Coriolis, and piston flow meters available to meet your specific coating needs
  - Full 3K capability
  
- **Increase efficiency and reduce coating and solvent waste**
  - **On-demand metering and mixing** with 1% flow and ratio accuracy drives significant reductions in coating waste. No integrator means less waste.
  - **Optional remote monitoring and troubleshooting** reduces risk of unexpected downtime
  - **Track and export process data** such as paint and solvent usage, spray time, ratio and flowrates, alarms and faults

# RF2 Auto vs Manual vs Multi-Channel

	RF2 Auto	RF2 Manual	RF2 Multi-Channel
<b>Process Capability</b>	<b>Automatic Gun Flow Control + Ratio Control</b>	<b>Manual Gun (Demand Mode) Ratio Control</b>	<b>Automatic or Manual</b>
Mixing/Flow Control	1K, 2K, 3K	2K, 3K	1K, 2K, 3K
<b>Number of channels</b>	<b>2 or 4</b>	<b>2 or 4</b>	<b>6 or 8</b>
Number of colors/catalysts/3K	Standard: 12/4/3    Max: 30/6/3	Standard: 12/4/3    Max: 30/6/3	Up to 60/12/6
Ethernet I/P connectivity	Standard	Standard	Standard
In-booth fluid panel	Optional	Optional	Optional
<b>Flow Devices</b>	<b>1K: DR-1    2K: MVR    3K: MVR</b>	<b>Pulse</b>	<b>DR-1, MVR, or Pulse</b>
Flowmeter	Gear, Coriolis, Fiberoptic	Gear, Coriolis, Fiberoptic	Gear, Coriolis, Fiberoptic
Inlet pressure control	Standard	Optional	Optional

## RF2 Turn-key standard packages cover the most common 1K and 2K applications: Competitive pricing and lead times as low as 2 weeks

### How to select your configuration:

1. Select 1K or 2K
2. Select low or high pressure
3. Select number of colors and catalysts (If desired combination is not listed, select 1 color 1 catalyst configuration and add color stacks separately)
4. Select material compatibility

#### 2K Low Pressure (300 psi)

Number of Colors	Number of Catalysts	Standard Materials Part Number	Isocyanate Materials Part Number
1*	1*	RF2-LA2-01-01-S	RF2-LA2-01-01-C
4	1	RF2-LA2-04-01-S	RF2-LA2-04-01-C
7	2	RF2-LA2-07-02-S	RF2-LA2-07-02-C
12	4	RF2-LA2-12-04-S	RF2-LA2-12-04-C

#### 2K High Pressure (3,000 psi)

Number of Colors	Number of Catalysts	RF2 Part Number
1*	1*	RF2-HA2-01-01-S

#### 1K, 2 Channels, Low Pressure (300 psi)

Number of Colors	Number of Catalysts	RF2 Part Number
1*	1*	RF2-LA1-01-01-S

\* Order color and catalyst stacks separately

\*\* Low pressure, multi-color systems only

#### All packages include:

- Inlet pressure regulators\*\*
- Gear flowmeters
- MVR flow control
- Solvent air/chop\*\*
- Flushable dynamic mix block
- Wall mounting

# Ransburg RCS2: Premium Performance

## Overview

- Precision 2K for the most demanding manual, automatic, and robot coating applications
- Magnetically-coupled fluid metering pumps for accurate control even at very low flow rates
- Up to 10 colors, 1 catalyst
- Datalogging capabilities

## Competitive Edge

- Unmatched trigger and flow control response increase production efficiency
- Coat complex or small parts more quickly and more consistently
- 15" touchscreen can display and control up to 4 fluid panels at once

## Applications

- Manual or Automatic spray, flow control
- 300 psi
- 2K, 8 flow channels, 4 fluid panels
- Automotive “Class A”, Industrial, ACE

# Metering and Mixing Accessories

# Low pressure color change valves (CCV)

- 1 to 30 colors, with solvent valve and optional air push
- Low pressure applications
- 304 Stainless Steel
- Modular design for customization
- Low cost
- Easy to maintain and rebuild

**SERVICE MANUAL** EN

**CCV-403-SS & CCV-403-SS-E  
COLOR CHANGE VALVES**

**SPECIFICATIONS**

Maximum air inlet pressure:	7 bar [105 psi]
Air requirements (operating pressure):	4.8-6.9 bar [70-100 psi]
Air inlet connection:	1/8" NPT (f)
Maximum fluid pressure:	20.7 bar [300 psi]
Fluid inlet connections (2x):	1/4" NPT (f)
Valve actuation speed (ON/OFF cycles):	55 cycles/min
Wetted Parts:	300 series Stainless Steel, PTFE

**SERVICE MANUAL** EN

COLOR CHANGE VALVE**

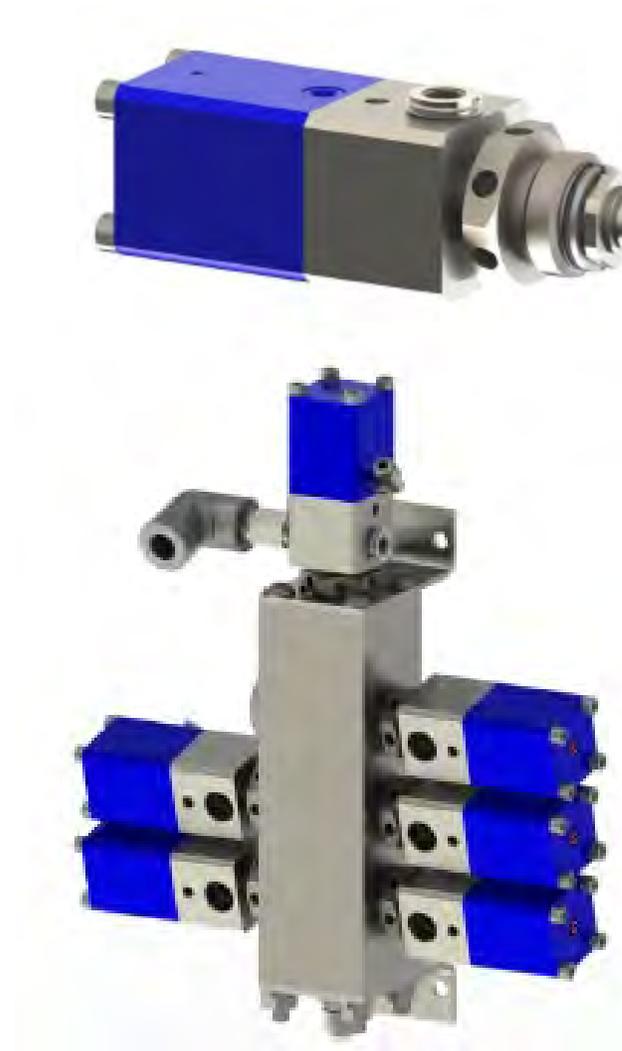

**SPECIFICATIONS**

Maximum air inlet pressure:	7 bar [105 psi]
Air requirements (operating pressure):	4.8-6.9 bar [70-100 psi]
Air inlet connection:	1/8" NPT (f)
Maximum fluid pressure:	20.7 bar [300 psi]
Fluid inlet connections (2x):	1/4" NPT (f)
Valve actuation speed (ON/OFF cycles):	55 cycles/min
Wetted Parts:	300 series Stainless Steel, PTFE

# High pressure color change valves (CCVHP)

- High pressure applications. Up to 3,000psi fluid pressure
- 316 Stainless Steel
- 1-30 colors available
- Acid compatible
- Easy to maintain and rebuild

# MCV2 color valve family

## SPECIFICATIONS

### Electrical / Physical

Operating Pressure:  
Fluid 300 psi max. (20.68 bar)

Operating Temperature  
Range: 55°F (12.8°C)  
130°F (54°C)

Fluid Tube (Metric):  
Inlet 10mm ODT  
Circulation 8mm ODT  
Solvent/Air Purge 10mm ODT  
End Plate Outlet 1/4-inch NPSM "AN"  
Style

Air Tube (Metric):  
Actuation 4mm ODT Inlet

Fluid Tube (Fraction):  
Inlet 3/8-inch ODT  
Circulation 5/16-inch ODT  
Solvent/Air Purge 3/8-inch ODT  
End Plate Outlet 1/4-inch NPSM "AN"  
Style

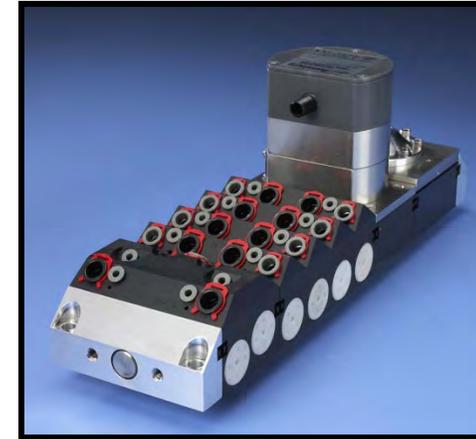

Air Tube (Metric-Fraction):  
Actuation 5/32-inch  
(4mm) ODT Inlet

Air Actuating  
Pressure: 75-120 psi (5.2-8.3 bar)

Maximum Number  
of Colors: 32

Construction Materials:  
Stainless Steel  
UHMW

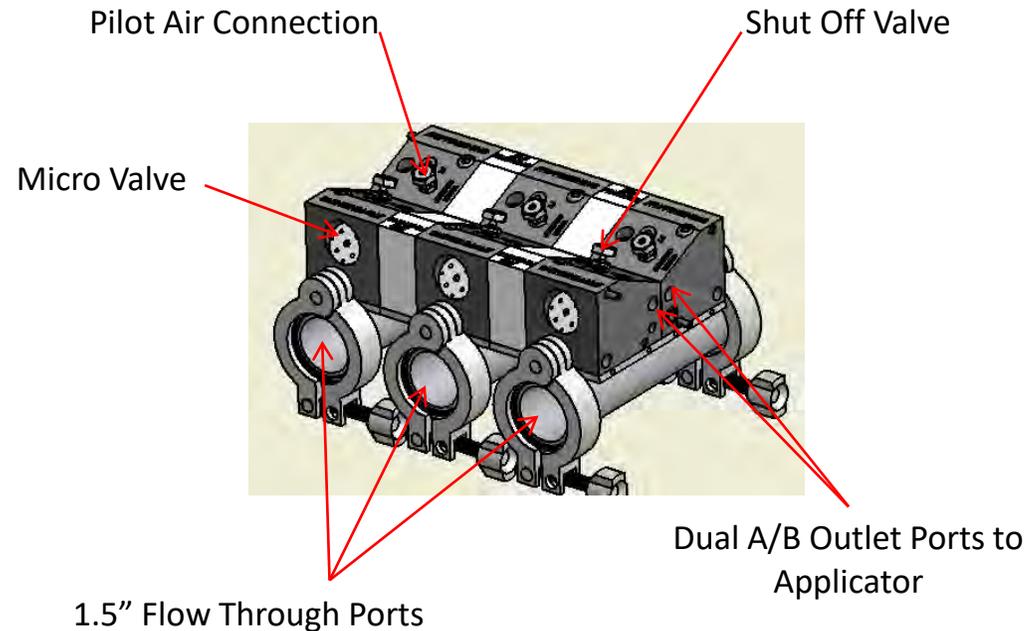

- Uses the sealed Microvalve design
- Fitting-less tubing connections
- Low pressure applications
- 304 Stainless Steel
- Modular design for customization up to 32 colors
- Lightweight, can be mounted on robot arm
- Metric and Fractional versions available
- Easy to maintain and rebuild
- Optional accessories include DR2 fluid regulator and flow meter

# Piggable Color Change Valves

## What is Piggable?

- “Piggable” means you can flush the entire circulation system quickly and easily and load a new color into that system with no cross contamination.
- This is done by pushing the old material out with a plug (pig).
- The old material is collected back into the supply to be reused.
- No material is lost during a system flush. It can all be reused.

# Remote color change modules and gun flush boxes

## Remote Color Change

- Allow operators to change colors, flush, and control equipment functions from inside the booth
- Increase efficiency and production speed

## Gun Flush Boxes

- Automatically flush hand guns during color changes
- Avoid messes and simplify cleanup
- Increase production speed

# How to select the correct 2K equipment

Criteria			
Manual spray	✓	✓	✓
Automatic spray with flow control		✓	✓
High pressure (3,000 psi) required	✓	✓	
More than 7 colors		✓	✓
More than 1 catalyst		✓	
Catalyst flowrates less than 10 cc/min	✓		✓
3K required		✓	
More than 2 guns per controller		✓	✓
PLC or robot integration required		✓	✓
Very rapid triggering and flowrate adjustment			✓

## ***Once the unit is selected, now select the configuration***

- Each 2K unit has slightly different configuration requirements, but below are key process parameters to know:
  - Material ratios
  - Material flowrates
  - Applicator types and quantities
  - Triggering frequency
  - Material supply equipment
  - Spray pressure
  - Material types and compatibility (PDS, SDS, MDS datasheets)
  - Number of colors
  - Number of catalysts
  - PLC or robot integration requirements
  
- Then work with your Carlisle Fluid Technologies Account Manager to help select the optimal configuration for your application

# The Brands You Trust

*BGK*<sup>™</sup> products deliver precision-engineered curing capabilities for a full range of coatings including liquid, powder, wax, UV and adhesives.

*Binks*<sup>®</sup> products boast innovative spray gun and air cap design along with industry leading pumps and controls.

*DeVilbiss*<sup>®</sup> products include low pressure manual and automatic spray guns and related spraying accessories. *DeVilbiss* products are widely acclaimed for ergonomics and innovative spray gun design.

*Hosco*<sup>®</sup> products deliver smooth bore, “cavity free” stainless steel fittings and accessories designed for use in paint circulating and application finishing systems.

*ms*<sup>®</sup> products include powder coating systems and equipment. *ms* is recognized throughout the world for quality, efficiency and durability.

*Ransburg*<sup>®</sup> manual and automatic electrostatic finishing products offer spray finishing solutions to industrial and automobile manufacturing markets.
